202
1

LTI Free Recycling of China Navigation Vessel under Supervision

201
9

Heavy Lift Cranes SWL 210 Tons and Complete Impermeable design

202
2

Maersk Line initiates Audit of facility for their Post Panamax Vessels

202
4

Obtained Certificate of Compliance (CoC) to the EU Ship Recycling Regulation (EUSRR), certified by Class-NK, reaffirming our commitment to international standards.

COMPLETE IMPERMEABLE DESIGN

- Our yard is completely impermeable and equipped with an impermeable jetty in the intertidal zone for heavy crane movement.

OUR EXPERIENCES

We have recycled numerous vessels till today and since 2018 we have recycled all vessels under HKC. We had opportunity to 'recycle two vessels of China Navigation Company under the monitoring of a third party team contracted by CNCo in 2020 - 2021

CONTINUED IMPROVEMENT COMMITMENT

Management Commitment for Responsible Ship Recycling Standards

To take a step further in the Sustainable Ship Recycling initiative, We invited many shipowners to visit / audit our facility including Cosco, Kline, Maersk and others.

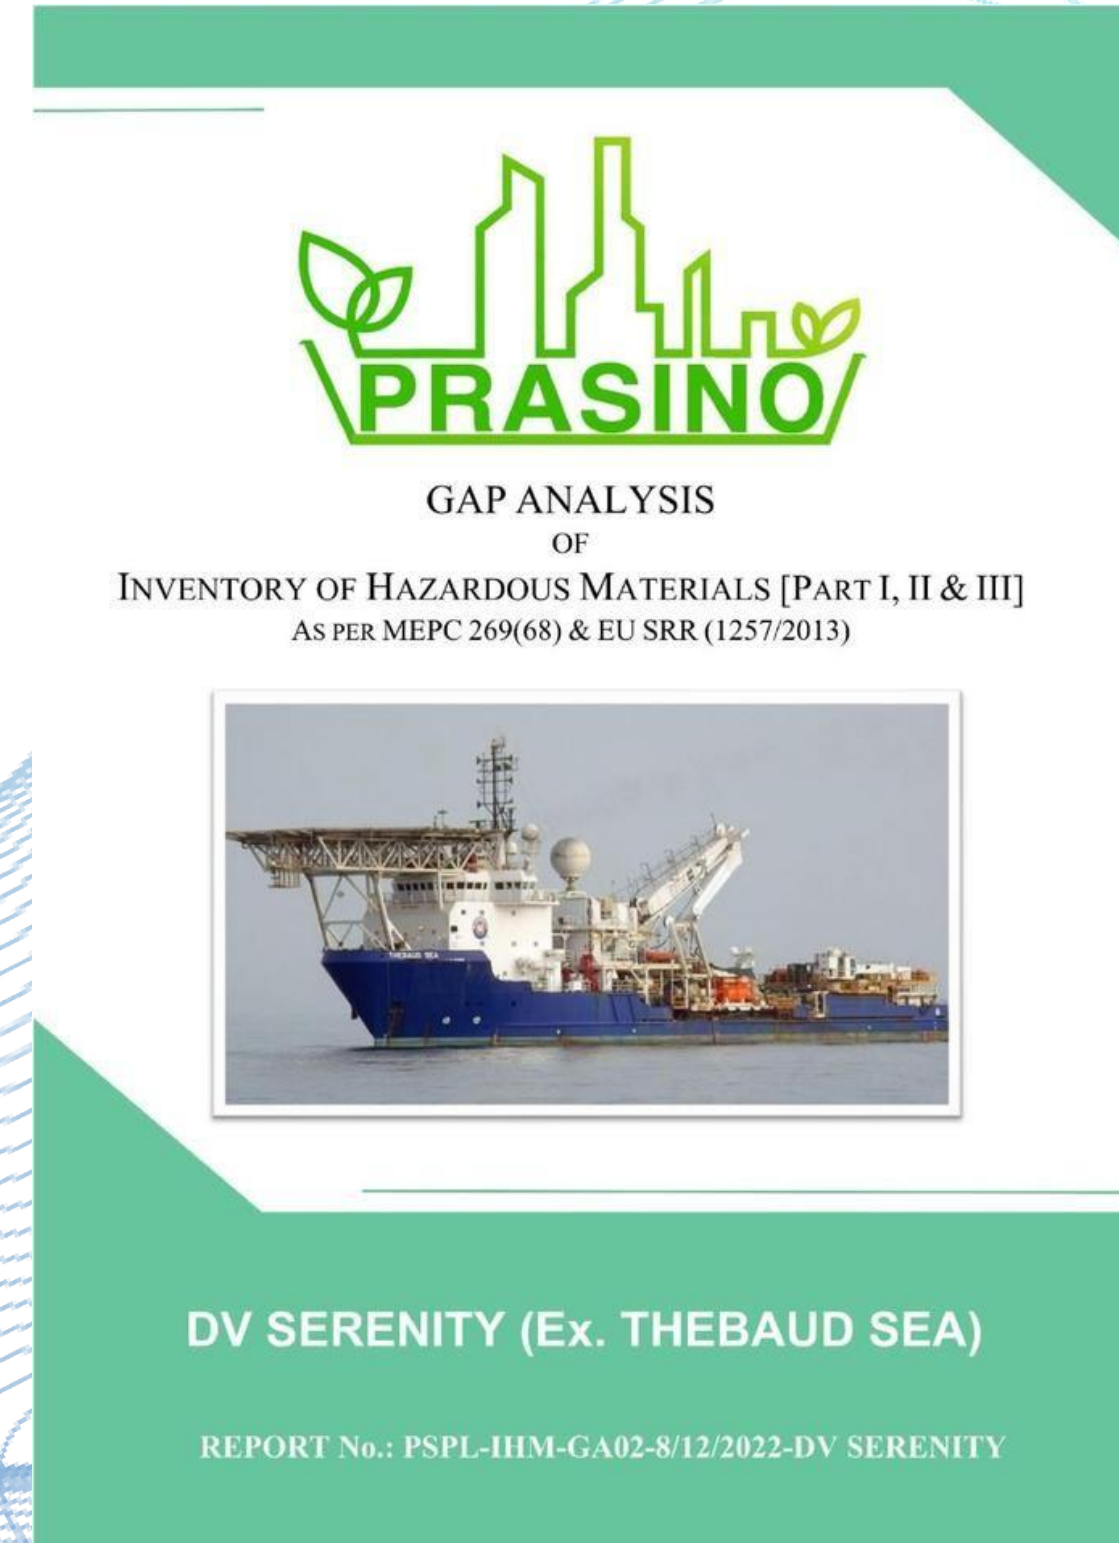

SHIP RECYCLING PROCESS EXCEEDING THE NORMS

IHM & ADDITIONAL SAMPLING

Before the arrival of the vessel an IHM is sought from the ship owners.

If no IHM then an IHM is made after landing of the vessel.

Additional Testing is done as a Gap Analysis for the IHM.

HEAVY LIFT CRANES

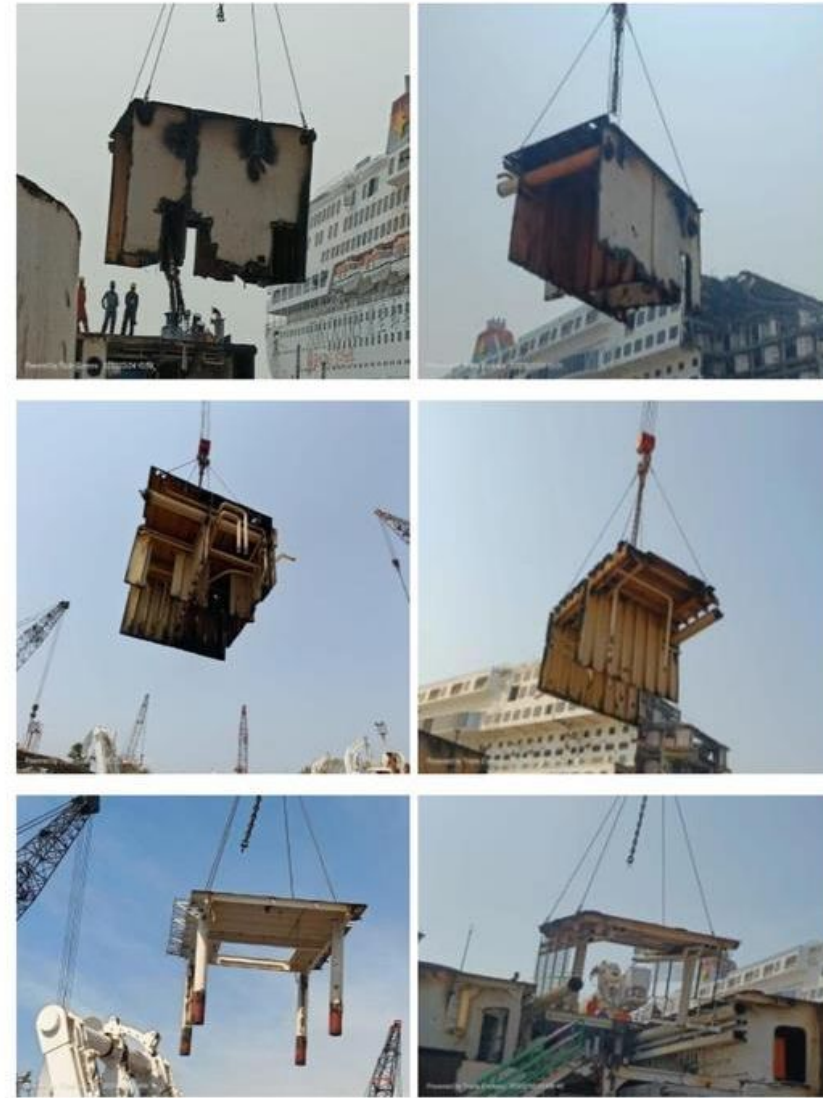

- Lifting of all sections of the vessel with zero impact on the environment
- We have installed a 210 MT capacity crawler crane at our SRY for lifting of all section from the vessel.

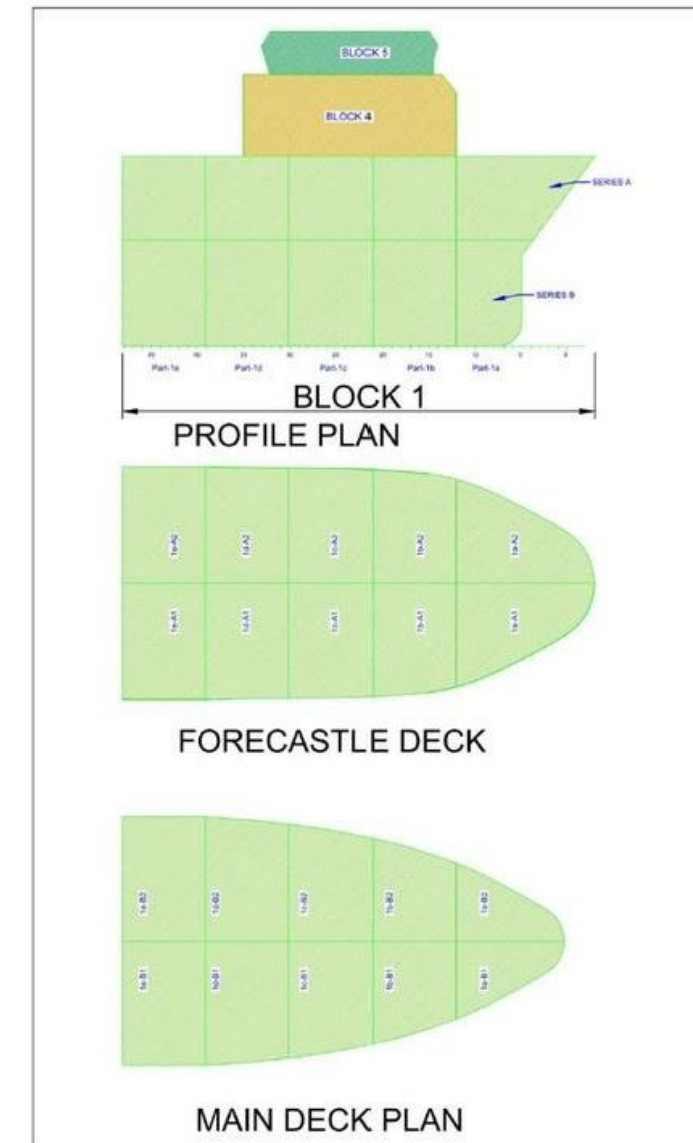

BLOCK TRACEABILITY

Each block is marked as per dismantling plan.

Photos while lifting using heavy crane is kept for record and traceability and made part of our completion report.

Profile and Plan views of the Block – 1 section is shown below,

ENVIRONMENTAL MONITORING PLAN

- Defined Standards for Testing and number of samples
- Environmental monitoring report analysis and mitigation

Prepared By:
GO GREEN MECHANISMS PVT. LTD.

EXPOSURE BASED MEDICAL MONITORING

The IHM is considered and a risk based approach is taken for additional testing.

(The plan is prepared for implementation)

Designation/ Employees	Required Medical Check-up							
	Ophthalmology Tests (Eye)	Lung function test	Chest X-ray	Blood test	Urinalysis and Urine Cultures	Heavy Metal blood test (Lead only)	Check-up for Ear	Consultation with Physician
All Gas Cutter and GC Helper	x	x	Optional	Optional	Optional	x	x	x
